NodeJS Notes

File Edit View Insert Format Tools Add-ons Help

Normal text 100% 11

o Export - export functionality, we want to use in another

o Require - Import the exported functionality

File test.js

// module.exports = variable;
var foo = (arg) => {
 console.log("exported module", arg)
};
module.exports = foo;

File app.js

var foo = require("./test");
console.log("imp", foo);
foo("param");

// export class
class Foo {
 constructor(name) {
 this.name = name
 }
 getName() {
 return this.name;
 }
}
module.exports = Foo;

// import class
var Foo = require("./test");
var inst = new Foo("user_name");
console.log(inst.getName());

3 Event Emitters
